Medicare Glaucoma Screening Benefit Details:

- Patient Eligibility:
 - Family History of Glaucoma
 - Have diabetes
 - African-American 50 and over
 - Hispanic 65 and over
- Must include a dilated exam w/ IOP measurement, and direct ophthalmoscopy or slit lamp biomicroscopy. If you perform any other diagnostic tests on the day of the visit (such as perimetry), the diagnostic test will be paid and Glaucoma screening will be denied, so you should schedule other tests for separate visits.
- Can be done again 11 months after the end of the month in which the screening was performed.
- Procedure Codes to use:
 - G0117 – Glaucoma Screening for high-risk patients
(allowed amount is around \$45, depending on your location)
 - G0118 – Glaucoma Screening for high-risk patients, Physician Supervision
(allowed amount is around \$30, depending on your location)
- Diagnosis Code to use:
 - V80.1 – Special Screening for neurological, eye & ear disease
